

Mrs. Mayer's Classroom News

Dear Parents,

Welcome to the month of March. We will begin the month by celebrating Dr. Seuss's birthday on March 5th. The students can bring their Dr. Seuss books and wear their pajamas on this day.

Social Studies

We will begin our unit on communities and community helpers. The students will learn about what a neighborhood consists of. The students will understand that communities are a place where we work and live. Finally, the students will understand that we depend on people in our community to keep us safe, healthy and happy.

Science

We will be learning about frogs and toads. The students will learn the different stages a tadpole goes through before becoming a frog. The students will learn that frogs and toads are amphibians. Finally, they will have a better understanding of how frogs and toads breathe.

Reading

This month we will complete Unit 5 and begin Unit 6 in our reading series. In this unit the students will practice words with the vowel spellings of /aw/, /au/ and /oi/.

They will also learn another way to write the consonant sound of /r/ spelled wr and /n/ spelled kn.

Language Arts

We will continue to learn about nouns, verbs and adjectives. We will also continue to write paragraphs using the Four-Square method.

Open House

We will be having our Open House on April 10th. Come check out the class to see what your child has been learning. This is an excellent opportunity to visit the first grade classrooms.

Have a wonderful month!

Mrs. Mayer
